A HUNTING BLIND **DESIGNED FOR**
THE MOST **DEDICATED HUNTER!**

MAXIMUM VISION - FULL WIDTH WINDOWS

Feel like you're hunting in an open stand,
with the comfort and scent containment of
a box blind.

★ **2026**

BOTTOM ENTRY BLINDS

Our bottom entry blinds were designed with food plots in mind. They are designed to sit on the edge of a food plot or field edge, and be wrapped in camo netting to conceal entry onto the blind.

In addition to camo wrap, food plot screening is also an option to further conceal the bottom of the blind.

BOTTOM ENTRY DOOR

The bottom entry door is on the underside of the blind and measures 24" x 30". It is hinged on the inside and has a pull on the inside. No exterior handle is needed, just simply push up and in.

SLIDER WINDOW, Opening size is 17" x 41" wide

The horizontal windows slide up and down using the weight and rope system, this allows the window to be up and out of the way while preparing to shoot.

They slide in a poly track system for quiet operation, They offer a sill height that is perfect for gun or crossbow, in addition, when the windows are in the closed position, they are scent tight, thanks to the top and bottom weatherstrip

VERTICAL WINDOW, Opening size is 12 3/4" x 40 1/2"

The vertical windows are hinged windows, they swing in and to the side, these windows are located in each corner of the blind and are the perfect height for compound bow hunters. They are also scent tight with weather stripping and window clips.

BLIND BUGGIES

Our Blind Buggies Were Designed For Hunters That Hunt Over Farmland or Large Tracts of Land with Food Plots, The Concept is To Relocate The Blind as needed to accommodate changing winds and seasons.

The Blind Buggy is also an excellent way to test a new area before committing to a permanent blind or stand. The Blind Buggy comes with four jacks for leveling and stabilizing

CONSTRUCTION OF THE BLIND

We use #1 Pressure Treated Floor Joists, 5/8" Plywood and double carpet layer for the Floor. The walls are 1 1/2" sq poly frame w/ metal reinforcement, poly and plexi glass exterior sheeting, 1 way vision camo cover on plexi glass C-Max vision panels, Acoustic interior wall panels to absorb sound and add insulation value

FULL DOOR BLIND [STANDARD DOOR]

Our full door blind is an excellent choice for hunters that want a full door blind that can be easily accessed without stooping or bending down, even while wearing a backpack and carrying a firearm or bow.

FULL Aluminum Door & Frame

Full doors measure 27" wide x 68" high, and have a 15" x 23" Slider Window. The full door comes with standard latch and key. It also features weatherstripping around the door for a scent tight seal, along with an aluminum door frame to help prevent warping.

BLACK ARROW BLIND KITS

Our disassembled kits are a great choice for hunters that are looking to setup a blind in the deep woods with limited access. All fasteners and instructions are provided. Phone support is available as well.
